For a simpler, "Commands Only " version, for use by a Squad Commander, see other Set of Commands.

**NOTE: \_ PROCEDURE FOR A "BLANK FILE" ON A "SQUAD WILL RETIRE" ON THE MARCH ABOUT TURN. (In Line Only).**

"Caution & "Executive" parts of Command should ideally be timed as follows:- ABOUT - TURN! Squad then takes further "Check" pace (Forward!) and (L) R (L) carries out about turn "Footwork".

IN A SQUAD OF ONLY 2 RANKS, the Blank File, on word "Turn!", takes his "Check" pace AS A "MARKTIME". This should mean that he is then in line with the Rear Rank (still in same direction), and does his about turn exactly as, and along with, the rest of the Squad. He is then in the correct position in Front Rank to move off after the About Turn, & does not have to "catch up" to the Front Rank, on the march, (and get out of Step!). Other Boys will need to take "Check" pace as a FULL pace, to work

**(BLANK FILE ABOUT TURN etc. PROCEDURE, (Contd.)**

For a Squad of 3 Ranks, - (and maybe even for a squad of 2 Ranks, as Boys tend not to take a FULL Pace on their "check" pace, before an About Turn on the March!) – The Blank File, on the Word "About", takes next 3 paces as a "Marktime", and then turns about, by then being in the Rear rank, with the rest of the Squad.

NOTE:- In either case, A Squad Commander, after giving "About" part of the Command, on the left foot, as recommended, should not delay the "Turn!" part of the Command beyond the next Left Foot. Otherwise the Blank File will be left "stranded" behind the rest of the Squad!
