

How to Make a Father's Day Shirt Card

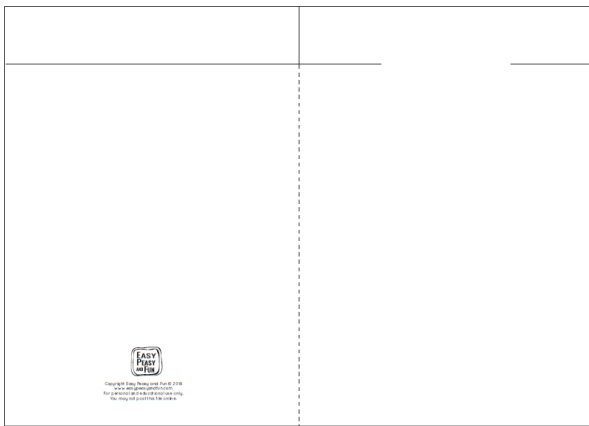

What you need:

- A4 Sheet of coloured card for shirt
- patterned paper for tie
- scissors
- glue

Step by Step DIY Tutorial

Fold the A4 sheet in half.

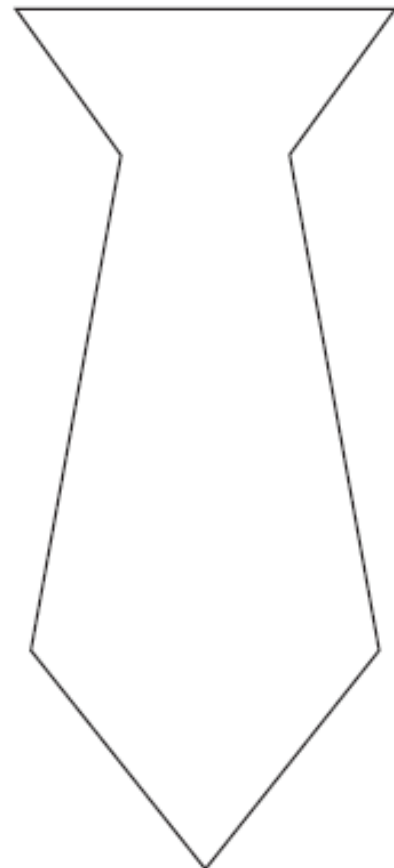

Open the A4 sheet of coloured card back up and draw a line along the top as per this picture.

Cut the card along the full line on the left and along the two slits on the right for the collar.

Fold the card in half again.

Cut out the tie from the patterned paper.

Add a bit of glue on the top of the tie (on the back) and glue it on the card base (between slits).

Fold the strips of paper on top of the card, the bottom corners towards the top of the tie to create a collar.

Glue isn't necessary to secure the collar but can be added.

Write your message inside the card.

All done! You've learned how to make a Father's Day shirt card.
