

ANCHORS

SPIDER'S WEB

GET ACTIVE

20 MINUTES

PREPARATION
NEEDED

▶▶ GETTING INTO THE ACTIVITY

Spider's webs are great for catching flies. Create your own web to see how many 'flies' you can catch with this throwing game.

An adult will need to help you set up your spider's web by sticking tape across a gap in a fence or between two poles. You'll need to tape it at different angles, to create a spider's web pattern. Masking tape works best but Sellotape would work too. Tear up pieces of paper and scrunch them into small balls to throw. Set up a throwing line.

Catch the Flies: Throw your scrunched up paper at the spider's web and see how many balls you can make stick to the web. How many 'flies' can you catch in 10 throws?

Dodge the Web: Now make the challenge not to get caught in the web. Award a point for every time you can get a scrunched up ball through the web. You could make smaller gaps in the web worth more points.

WHAT YOU'LL NEED

- Masking Tape
- Scrunched-up Paper

NOTES FOR PARENTS & CARERS

All activity should be supervised by an adult. Care will be needed when taping to ensure surfaces are not damaged. Ask an adult to share a picture of your spider's web with your BB group or send to RoI BB HQ.
